HALLEY'S COMET

1985-1986

1. Pronounced HAL-ee (rhymes with valley).
2. Julius Caesar saw the comet when he was 13 years old in the year 87 B.C.
3. Edmund Halley first saw the comet in 1682 and predicted its return 76 years later. When the comet appeared as predicted it was named after him.
4. Mark Twain, author of Tom Sawyer and Huckleberry Finn, was born when Halley's Comet appeared in 1835 and liked to say "I came in with Halley's Comet and I'll go out with it." Mark Twain died in 1910 soon after Halley's Comet appeared.
5. Comets are made of dust, stones, and ice, and are sometimes called "cosmic snowballs."
6. The three main parts of a comet are the tail (the part most easily seen from earth); the coma (the region where the tail seems to originate); the nucleus (a small region at the center of the coma).
7. The nucleus is considered small by space standards as it only weighs 65 billion tons.
8. The tail of Halley's Comet in 1910 stretched out 150 million miles long!
9. Halley's Comet goes around the sun approximately every 76 years.
10. After the 1985-1986 appearance, Halley's Comet is due to reappear in the years 2061-2062.

I have seen Halley's Comet
